SourceOne and NAI Tech Products Form Alliance To Deliver Enhanced DICOM Connectivity Solutions

MENTOR, Ohio and AUBURN, California (September 22, 2004) - SourceOne Healthcare Technologies, Inc., the nation's leading distributor of medical imaging systems, equipment, supplies and services, and NAI Tech Products, a leading manufacturer of DICOM network connectivity solutions, digital imaging components, services and PACS accessories, have announced that the companies are entered into a strategic distribution agreement.

Under the terms of the agreement SourceOne will market and distribute NAI's DiCOM box®, MDR® Medical Digital Recorder™ and PACS Print® products throughout the United States. The agreement extends an existing relationship established by the two companies more than three years ago giving SourceOne's customers access to NAI Tech's market leading DICOM connectivity and medical DVD recording solutions.

"We are committed to identifying and providing solutions in order to meet the needs of our customers," said Jerry C. Cirino, SourceOne's president and CEO. "NAI is a recognized leader in the integration of analog modalities to PACS and has developed innovative and cost effective technologies which compliment our digital solutions. We have enjoyed an excellent partnership with NAI and want to expand the use of NAI's products as they offer tremendous value to our product offerings."

NAI Tech Products is a leader in DICOM connectivity solutions and a global supplier to manufacturers of diagnostic imaging equipment, PACS and distributors of conventional and digital imaging solutions. More than 5000 of their DICOM box® connectivity systems are installed worldwide. Recently, NAI Tech recently introduced a line of medical DVD recorders, the MDR® and will unveil their new MDR-Video at RSNA 2004. The new system allows any modality to capture dynamic image series to a CD or DVD in

DICOM format, and is ideal for portable applications such as ultrasound and mobile C-arms as well as digital receptor imaging and CR computed radiography.

"SourceOne has a proven track record assisting its customer's integration of their analog systems to support PACS and print network implementation" explained Paul Dempster, vice president and general manager of NAI Tech Products. "SourceOne is unique in the range of PACS products and services it offers its customers all supported through an extensive national sales and service force. Combined with their customer service focus and industry knowledge there is no better partner for the distribution of NAI's products."

In addition to the DiCOM box® connectivity products and MDR® Medical Digital Recorder, the agreement includes PACS Print® a software based utility that provides DICOM printing from conventional ink-jet or desktop laser printers for low cost paper prints directly from modalities or workstations.
